The File of Life program in the Hampshire and Franklin Counties began in 1992. Medical emergencies can happen anytime. When they do, there is confusion, panic and urgency. Paramedics arrive on the scene with no information about the person in need. Seconds count – they can make the difference between life and death. Does the patient have prior medical conditions? Allergies? What medications are they taking? Who do they want us to call? How do we contact their family or friends? File of Life puts these answers at their fingertips. It allows first responders to immediately begin the best possible treatment, notify loved ones, and pass this vital data on to awaiting physicians at the emergency room. File of Life has already saved thousands of lives. It is an absolute asset to emergency preparedness, and peace of mind, for every household and community across the nation. Today, the File of Life can be found in homes across the country. The File of Life comes in two formats; a magnetic packet that is kept on a seniors' refrigerator, and a small pocket size to be kept on a seniors' person. The File of Life is now a national non-profit organization that promotes emergency preparedness.
